KABELGENOMFÖRING

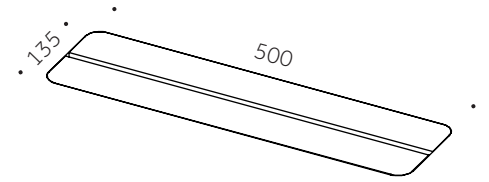

Alla rektangulära bord i Unite Wood-serien går att få med kabelgenomföring på olika sätt. De rektangulära borden har alltid en bom mellan sina stativ. Dessa går att byta mot dubbelbomar som gör det möjligt att ha en genomföring i skivan. Till dessa bubbelbommar finns kabeldiken som döljer både kablar och konstruktion.

Urtaget är 500x135 mm.

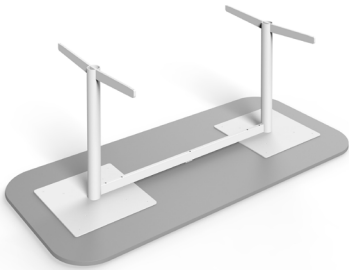

CABLE ENTRY

All rectangular tables in the Unite Wood-series can be supplied with cable entry in different ways. The rectangular tables always have a bar between their stands. These can be exchanged for double beams which make it possible to have a cable entry in the table top. On these beams you can add a tray that hides both cables and the construction

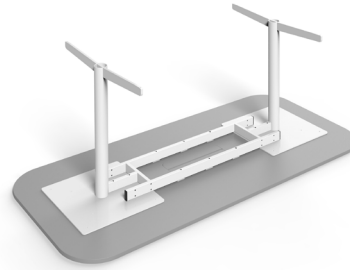

The cable entry in the table top is 500x135 mm.

MILJÖDEKLARATION

Vi arbetar systematiskt med vårt hållbarhets och miljöarbete. Vi driver arbetet med ständiga förbättringar inom vårt ledningssystem som är certifierat enligt ISO 14001 sedan 2011.

Vi ser hela kedjan från vår leverantörs leverantör till vår kunds kund. Vi arbetar höga miljökrav på ingående material, leverantörer, processer och modeller för att uppfylla hållbarhetskraven i dagens samhälle.

Vi arbetar med långa relationer med anställda, leverantörer och kunder och vi strävar efter att våra möbler ska leva så länge som möjligt för att vara så hållbara som möjligt.

EPD

We systematically work with our sustainability and environmental issues. We push the work with continuous improvements within our management system, which is certified according to ISO 14001 since 2011.

We see the entire chain from our supplier's supplier to our customer's customer. We work with high environmental requirements on included materials, suppliers, processes and models to meet the sustainability requirements of today's society.

We work with long-term relationships with employees, suppliers and customers and strive for our furnitures to live as long as possible in order to be as durable as possible.

Vi har under åren tagit fram miljömål med minskning av lösningsmedel, som nu är minimala efter att vi gick över till vattenburna lacksystem.

Vi har minskat vår elförbrukning radikalt och vi har halverat koldioxidutsläppen som produktionen i vår fabrik ger upphov till. Vi sätter hela tiden upp nya mål för att nå längre i viljan att bli med hållbara.

Over the years, we have developed environmental goals, with a reduction of solvents, which are now minimal after we switched to water-based paint systems.

We have radically reduced our electricity consumption and we have halved the carbon dioxide emissions that the production in our factory causes. We are constantly establishing new goals to reach further in the will to join durable.
